

rehabmodule. patients

Patients get **free use** of the RehabModule™ (www.rehabmodule.com) rehabilitation patient education software tool in a participating healthcare or fitness professional's facility. When prescribed by a professional, patients get **free 24/7 access** to the same motion capture based animated rehab protocols from anywhere outside the facility at anytime.

how it works

In A Facility

- Use RehabModule at your healthcare or fitness professional's facility.
- They will give you a rehab prescription with a Web address to access their RehabModule Web page from outside the facility.

Free Anywhere, Anytime

- Now you have **free 24/7 access** to your healthcare or fitness professional's RehabModule software from home, work or on the road.

features

A complete rehab protocol

All 8 of our rehab protocols include a complete program of physician reviewed exercises and stretches needed for your rehab.

Free for Patients

Patients get **free 24/7 access** to RehabModule in a professional facility and in their home, work or on the road.
